

Highly Affordable, VIMS starts as low as \$35.00 a month, Total, for 1 - 25 users.

Hourly Reporting

Allows your personnel to Log their hours and activities performed from any computer with real time viewing of those hours and task performed in both text and graphical format from any web connected computer and other devices such as an iPhone. View reports in a number of different formats from Year to Date, Individuals Hours Logged to specific task performed and other formats.

Prospect Tracking

Record prospective new members with our Prospect Tracker module so you don't lose good candidates! Track the status of each person by viewing their progress in the "hiring" phase.

Notify all personnel of events with unlimited email or text messages in less than a minute at up to three separate email and/or text addresses per user.

Learn More at: www.myvims.com

PICTURED ABOVE: VIMS admin screen as it appears on a desktop PC. Auto fits to size for tablets, iPhone or Android Smartphone.s VIMS is a "mobile responsive" application that automatically adjusts to the screen size you're viewing it on. *There are no special "apps" to download*, simply connect to your VIMS site from any browser enabled device via a secure SSL connection!

Recognition Tracking

Track recognition and service awards due dates by hours and/or months of service. Automatically send a customized e-mail to your personnel on their birthdays and/or year of service anniversary to let them know you're thinking of them!

Training Manager

This fully integrated module allows you to enter all your training classes and set up each one to show when and how often it's required. The system will also alert you to past due dates to reduce your agency's liability and ensure compliance as required.

Forms Distribution

Post forms online in a secure and centralized page to easily communicate needs and information within your organization. Newsletters, Training Manuals, Policy Manuals, maps, etc., open all with one click!

Smart Groups for Administrator Access:

The Smart Groups feature allows for the grouping of individuals, units, squads, stations, etc., with unlimited, free administrator accounts. Admins may be assigned to unique groups only or all groups as needed.

A Highly Integrated, Feature Rich Calendar and Scheduling System:

Post and schedule events via our integrated calendar and scheduling program. Administrators can choose to send the event request to all personnel or specific groups via e-mail allowing them to schedule themselves for the event while displaying that day in green on their personal VIMS calendar. Our exclusive "One Button Buddy" feature allows your personnel to post a request for a shift partner on the VIMS calendar and/or send an external e-mail to everyone in their group announcing the need. Then, with just the click of one button, fellow personnel can schedule themselves to work with that person during the requested date and time. VIMS also allows for the reserving of available resources to ensure they're available for your personnel when they arrive to perform their task such a vehicles, equipment, radios or other needed resources.

Personnel Manager: Allows administrators to view, edit and search your personnel's pertinent information such as home address, e-mail addresses, telephone numbers, emergency contact information, date of hire, head shot photos, etc., and any statistical data you chose to gather upon registration. Our Administrative Control Panel allows VIMS administrators to customize the users registration page to display the information they want to collect and create their own "self defined" questions for various certifications, qualifications, licenses, etc. This powerful search tool provides you with the ability to quickly find personnel who may have the needed skills within your organization during critical times and other.

Your Data is Safe, Secure and Available 24/7 from any browser enabled device: All our VIMS servers, support team and programming is U.S. based and data is backed up daily to a separate U.S. data center. VIMS accounts are protected by a unique user name and password in addition to using the latest SSL certificates to encrypt data between your site and our servers. Our Level III data center is staffed 24/7 with experienced network technicians to monitor our servers with secure physical access via biometric access control systems, and more for authorized personnel only.
